## WOOD PRESERVER

# Application

## GUIDELINES

# Application Guidelines

## What You Will Need

ROXIL® ENHANCED DECKING OIL

ROXIL® 100 WOOD & PATIO CLEANER (RECOMMENDED)

ROXIL® WOOD SCRUB GEL (RECOMMENDED)

PAINT BRUSH

STIFF BRUSH

HOSEPIPE

SANDPAPER

## Preparation

Any paint, varnish, dirt or other surface coating should be removed before application, sanding may be required to return the wood to a sound surface. Wood should be clean and free from dust and other contaminants, use a suitable cleaner such as Roxil® 100 Wood & Patio Cleaner. More severe grime and greying caused by aging can be removed with Roxil® Wood Scrub Gel. Extreme caution should be use if using a pressure washer. Ensure low pressure is used and allow 24 hours or more for timbers to fully dry before further treatment. Timber to be treated should be reasonably dry before treatment although the product will penetrate into damp timbers. Do not apply if rain is forecast in the next 48 hours to allow time for **Roxil® Wood Preserver** to dry before the application of a top coat such as Roxil® Wood Protection Cream, Roxil® Wood Protection Liquid or Roxil® Enhanced Decking Oil.

## Overcoating

**Roxil® Wood Preserver** must be overcoated when used outdoors. Roxil® Wood Protection Cream, Roxil® Wood Protection Liquid and Roxil® Enhanced Decking Oil are recommended as suitable overcoatings to give water repellent properties to the wood surface. Allow the treated wood to fully dry, typically at least 24 hours, before applying an overcoat. Refer to datasheet or application guide for the overcoat.

## Staining

If staining is required, Roxil® PC Coloured Wood Preservers offer the same protections and are available in a range of fade-free colours. It is recommended to apply the stain first and allow the fence to fully dry before applying an overcoat.

ROXIL® COLOURED WOOD PRESERVERS

## Coverage

Coverage rate: 5 m<sup>2</sup> per litre

Pack size	Area treated
1 litre	5 m <sup>2</sup>
5 litres	25 m <sup>2</sup>

## Application

**1** Remove any loose such as hanging baskets or pot plants. Protect the surrounding area such as grass, paving and plants with ground sheets.

**2** If there is biocidal growth, clean the surface with Roxil® 100 Wood & Patio Cleaner, then brush down with water.

**3** If there is heavy grime or greying caused by aging, clean the surface with Roxil® Wood Scrub Gel and allow to dry out thoroughly.

**4** Roxil® Wood Preserver can only be applied by brush, so decant the liquid into a convenient container.

**5** Brush Roxil® Wood Preserver directly onto the wood, ensuring the preserver gets into all the tight spaces and corners.

**6** Once treated and fully dry, it is recommended that the wood is over-coated with a Roxil® protective treatment.

## Why Use a Wood Preserver?

### Prevent Rot and Fungal Attack

Most buildings and structures that use wood as part of their construction are at risk from rot and fungal attack. These problems can severely reduce the structural integrity of a construction.

Roxil® Wood Preserver's deeply penetrating and powerful formula will not only prevent rot and fungal attack in wood but will also prevent further progress of existing cases.

### Prevent Woodworm Infestation

Woodworm infestations can be active long before any visible symptoms, such as exit holes, begin to show. The ideal place for woodworm to nest is warm and damp wood. The infestations can be extremely destructive.

Roxil® Wood Preserver penetrates into the wood and kills any woodworm larvae that are present. It will also prevent future infestations.

### Prevent Mould and Algae Growth

Mould and algae growth occurs when a material is wet or damp. Repeated instances of mould and algae can permanently discolour wood. Treatments must be chosen carefully as some natural oils can actually increase the likelihood of biocidal growth.

Roxil® Wood Protection Cream and Roxil® Wood Preserver both significantly reduce mould and algae growth, keeping wood cleaner for longer.

# Roxil®

## WOOD PRESERVER

- Increases lifetime of timber
- Solvent-free primer
- Ready-to-use
- Compatible with  
Roxil® Wood Protection Cream
