HSE No.	10815
Active Ingredient(s)	Cypermethrin 0.1%, Benzalkonium Chloride 0.1%
Shelf Life	24 months

Application Information

Preparation

When you are experiencing a silverfish infestation, **NOPE!® CP Silverfish Killer** is an important part of a control strategy. Before using **NOPE!® CP Silverfish Killer** spray it is advisable to take the following steps:

- Identify the species of silverfish – common silverfish do not require much intervention, while grey silverfish require a more involved strategy
- Introduce ventilation and repair any dripping water fittings. This will reduce humidity and make the environment inhospitable to common silverfish

To ensure a successful treatment with **NOPE!® CP Silverfish Killer** consider the following steps:

- Use a bait based product
- Use silverfish traps

Application

Read the label before treatment.

NOPE!® CP Silverfish Killer should be sprayed onto hard surfaces and soft furnishings in affected areas. Pay particular attention to floorboards, skirting boards, behind boxes, pictures, books and furniture.

Using the spray bottle provided at a rate of 25 – 50 ml per metre square. A 500 ml pack should cover 10 to 20 m².

Wash hands thoroughly after use. Keep unprotected people and animals away from treated surfaces until they are fully dry.

After treatment, avoid vacuuming the room for as long as possible – preferably for a minimum of 7 days. This helps to prolong the residual effect of the **NOPE!® CP Silverfish Killer** treatment, ensuring that as large a proportion as possible of the silverfish population come into contact with treated surfaces.

NOPE!® CP Silverfish Killer is not to be used on human bedding, pet bedding, pet sleeping quarters, or where pets frequently lie – instead these areas should be thoroughly washed with hot water.

NOPE!® CP Silverfish Killer is not to be used on food contact surfaces.

Other Information

For full health and safety information consult the safety datasheet (SDS). This product is approved under the Control of Pesticides Regulations (1986) for use as directed. HSE No. 10815. Use pesticides safely. Always read the label.
