

# Oldroyd Gtx 10 Geotextile Membrane

## Product Description

**Oldroyd Gtx 10 Geotextile Membrane** is made from polypropylene and is black in colour. The membrane features welded geotextile fleece and 10 mm studs. It is primarily used to protect basement walls and foundations against moisture. It is designed for installation externally. Suitable for use vertically and horizontally.

| Accreditations  |        |
|---|--------|
|  | SINTEF |

## Benefits

- Resistant to water and water vapour
- Welded geotextile fleece prevents blockage from fine particles
- Extra strong and high-load
- Can be used in conjunction with external insulation
- Highly durable
- No maintenance required

## Properties

|                     |   |
|---------------------|---|
| Appearance          | Black, moulded polypropylene sheet incorporating raised studs |
| Size(s) & Packaging | 2 × 15 m roll   |
| Coverage            | 30 m <sup>2</sup>   |
| Service Life        | For the life of the structure in which it is incorporated     |
| Storage             | Cool, dry conditions  |

## Application Information

### Preparation

Surface to receive membrane should be sound and structurally stable.

### Application

The membrane can either be temporarily fixed to the structure prior to backfill and the weight of the excavated soil will hold the membrane in place. Alternatively, **Oldroyd Gun Plugs** can be used to offer a permanent fix to the walls. Please call our technical department for further advice.

## Other Information

**Oldroyd Gtx 10 Geotextile Membrane** is produced in accordance with ISO 9001 and ISO 14001 quality and environmental management systems.

**Oldroyd Gtx 10 Geotextile Membrane** is non-hazardous to the environment.
