

# Oldroyd® Xv Black Cavity Drainage Membrane

## Product Description

**Oldroyd® Xv Black Cavity Drainage Membrane** is made from polypropylene and is black in colour. The membrane features a combination of embossed 'X' pattern and 7 mm studs. It is suitable for application to walls, floors and vaulted ceilings, as part of a damp-proofing or waterproofing strategy. It is fixed to walls by means of Oldroyd® Brick Plugs and loose laid on floors.

Accreditations	
	

## Benefits

- Resistant to water and water vapour
- Resistant to ground salts
- Increased tensile strength due to unique 'X' pattern feature
- Highly durable
- No maintenance required

## Properties

Appearance	Black, moulded polypropylene sheet incorporating raised studs
Size(s) & Packaging	2 × 20 m roll
Coverage	40 m <sup>2</sup>
Service Life	For the life of the structure in which it is incorporated
Storage	Cool, dry conditions

## Application Information

### Preparation

Repair any significant defects in the substrate. If installing the membrane to existing rendered background, this can be left in place as long as the bond between the underlying substrate and the render itself is sound.

### Application

Fix the membrane to the walls using Oldroyd® Brick Plugs. All joints to be sealed using the appropriate sealing tape. Please refer to full application guidelines or call our technical department for further advice.

## Other Information

**Oldroyd® Xv Black Cavity Drainage Membrane** is produced in accordance with ISO 9001 and ISO 14001 quality and environmental management systems.

**Oldroyd® Xv Black Cavity Drainage Membrane** is non-hazardous to the environment.
