

# Oldroyd Xv Green Roof Membrane

## Product Description

**Oldroyd Xv Green Roof Membrane** is made from polypropylene and is green in colour. The membrane features a combination of embossed 'X' pattern and 7 mm studs. It is primarily used as part of a green roof drainage system. It is fixed by means of roof plugs and nails on pitched roofs.

### Accreditation

## Benefits

- Resistant to water
- Easy to install and stable
- Rubberized friction layer
- Increased tensile strength due to unique 'X' pattern feature
- Highly durable
- No maintenance required

## Properties

Appearance	Green, moulded polypropylene membrane incorporating raised studs
Size(s) & Packaging	2 × 20 m roll
Coverage	40 m <sup>2</sup>
Service Life	For the life of the structure in which it is incorporated
Storage	Cool, dry conditions

## Application Information

### Preparation

Surface to receive membrane should be waterproof, sound and structurally stable.

### Application

The membrane is rolled out on top of an appropriate waterproof layer. For stability, the membrane is mechanically fixed using **Oldroyd Turf Roof Plugs** and nails. The rolls of membrane have flat edges for overlap joints where mastic or **Oldroyd Sealing Rope** can be used to provide a seal. **Oldroyd Turf Roof Hooks** are utilised along the retaining edge of the eaves.

## Other Information

**Oldroyd Xv Green Roof Membrane** is produced in accordance with ISO 9001 and ISO 14001 quality and environmental management systems.

**Oldroyd Xv Green Roof Membrane** is non-hazardous to the environment.
