ProBor 20 Wood Preservative Gel

Product Description

ProBor 20 Wood Preservative Gel is a gel wood preservative containing 20% active ingredient and applied to timber by brush. It can be used for the treatment of large sectional timber and roof spaces. It is also effective against wood-boring insects, and is particularly useful when treating Deathwatch Beetle.

Benefits

- Dual purpose
- Solvent-free
- Ready for use
- Excellent penetration
- Low odour

Application

ProBor 20 Wood Preservative Gel is intended for application to unpainted, unvarnished timber. All timber surfaces should be cleaned of dust as far as practically possible.

Apply a generous brushed coat, taking special care to ensure that end grain, corners, joints and crevices are treated. Brush apply to surfaces exposed by cutting after treatment.

Large timbers may need more than one coat or an additional treatment with ProBor 50 Wood Preservative Paste. On dusty timbers it is recommended that the timber is 'wetted' by the application of sprayed water, this will stop the gel from 'balling'.

Other Information

For professional use only. For use only as a wood preservative. For full health and safety information consult safety data sheet. This product is approved for use under the Control of Pesticides Regulations (1986) for use as directed. HSE No.10108. Use pesticides safely. Always read the label.
