

Safeguard® Dust Suppressant

Product Description

Safeguard® Dust Suppressant is a liquid applied breathable sealer to control dust on internal feature walls such as exposed brick and porous stone surfaces.

Benefits

- Ready to use
- Controls surface dust
- Matt finish
- Maintains appearance of exposed brickwork

Properties

Appearance	Semi-clear white liquid
Density	1.0 g/cm ³ (approx.)
Size(s) & Packaging	5 litre jerry can
Coverage	5 – 10 m ² per litre
Storage	Protect from frost. Store above 5°C

Application Information

For use on internal surfaces only. Ensure all sources of dampness have been rectified prior to treatment, e.g. rising or penetrating damp.

All surfaces should be fully dry and clean, and free from dirt, grease, dust or other contaminants.

Ensure a test area is carried out prior to full application to ensure compatibility and acceptability of the finish.

Using a brush or roller apply one coat evenly to the surface to achieve a matt finish. Further coats can be used for particularly affected walls but will increase the likelihood of surface darkening and a sheen-like finish.

All equipment should be cleaned immediately after use with water. It is advisable that equipment should be cleaned/flushed during the course of application if breaks are expected during application.

Other Information

Keep out of reach of children and animals. Unprotected persons and animals should be kept away from treated surfaces until dry. For full health and safety information consult Safety Datasheet (available on request). Always read the label.

Safeguard® Dust Suppressant is produced in accordance with ISO 9001 and ISO 14001 quality and environmental management systems. **Safeguard® Dust Suppressant** is non-hazardous to the environment.
